

Key Knowledge

Key Vocabulary

Spelling	Definition/Sentence
germination	When the conditions are right, the seed soaks up water and swells, and the tiny new plant bursts out of its shell.
sprout	When a plant sprouts, it grows new shoots.
shoot	A shoot grows upwards from the seed or plant to find sunlight.
seed dispersal	This is when seeds move away from the parent plant. They can be moved by wind or animals.
sunlight	All plants need light from the sun to grow well. Some plants need lots of sunlight whereas others only need a small amount.
water	All plants need water to grow. Without water, seeds and bulbs will not germinate.
temperature	Temperature is how warm or cold something or somewhere is. Some plants like cooler temperatures while others like warmer temperatures.
nutrition	Food or nourishment. Plants make their own food in their leaves from the sunlight.
life cycle	All living things begin life and then grow and change until they are mature (fully grown) then they produce new life of their own.
